SUMMARY

Entrepreneurial BBA (Management & Information Technology) student at the University of Toronto Scarborough with hands-on experience in lean product discovery, agile delivery, customer research, and business case development. Proven ability to track progress, identify dependencies, prepare status updates, and support timely execution across concurrent initiatives. Comfortable working with engineering, product, and business stakeholders, translating complex workstreams into clear, structured communications.

EXPERIENCE

Agile Project Coordinator @ First Year Learning Integration Program (FLIP)

University of Toronto Scarborough (Department of Management)

April 2025 - Present, Toronto, ON

- Supported end-to-end delivery of 20+ concurrent initiatives, tracking timelines, dependencies, and execution risks across 5-7 parallel academic and operational workstreams to ensure on-time delivery across short academic cycles.
- Built Excel-based KPI dashboards monitoring participation, engagement, and operational performance to inform iteration decisions.
- Prepared weekly status updates, summaries, and documentation for program stakeholders to support alignment and decision-making.
- Assisted with meeting coordination, agenda preparation, and follow-ups to support structured decision-making.

Program Operations & Internal Strategy Coordinator

Management & Technology Association @ UTSC

September 2024 - Present, Toronto, ON

- Supported internal program operations by planning, tracking, and reporting initiatives under defined governance requirements.
- Prepared and presented program and financial updates to stakeholders within the Department of Management.
- Led 3 structured recruitment cycles, screening 100+ applicants, coordinating interviews, and delivering a one-week end-to-end hiring timeline.

Junior Product Management Intern

SAVI Finance

November 2024 - April 2025, Toronto, ON

- Supported MVP delivery by gathering requirements, tracking readiness, and coordinating execution across product and engineering teams.
- Participated in daily stand-ups and sprint ceremonies, helping surface blockers, risks, and next steps.
- Assisted with dependency tracking and progress reporting, enabling smoother handoffs and on-time delivery.
- Prepared and delivered MVP demos and status presentations, translating technical progress into concise stakeholder communications.
- Maintained execution artifacts in Jira and Confluence, supporting visibility from initiation through release.

PROJECT

Founder & Product Lead - Smaked

smaked.com

- Led end-to-end product development from problem discovery through validation, conducting primary customer research and surveys to identify unmet needs in high-traffic environments (students, commuters, professionals).
- Designed a website and a functional Android application, translating business requirements into user flows, features, and technical components.
- Synthesized research, and technical outputs into business cases and executive-ready presentations, and pitches, acquiring 500\$ in funding.

EDUCATION

Bachelor of Business Administration Management & Information Technology

University of Toronto Scarborough • Toronto, ON, Canada • 2028
