SUMMARY OF QUALIFICATIONS

- Worked with senior leaders and external technology partners to shape an AI-enabled enterprise learning program supporting 1,000+ data science practitioners across the organization.
- Analyzed a company's strategic pivot toward AI, developed actionable recommendations, and delivered a client-style pitch that earned 1st Place in a consulting case competition.
- Built a three-year company financial model and Power BI dashboard to assess liquidity and solvency, using historical performance to forecast next-quarter results.
- Used Bloomberg Terminal and financial research tools to analyze prospective IPOs and market conditions, translating findings into an investment recommendation presented to faculty.

EDUCATION

Bachelor of Business Administration Management & Information Technology

University of Toronto Scarborough

Sep 2023 - Present, Toronto, ON

- Relevant Coursework: Principles of Finance, Quantitative Methods in Economics, Strategy & Technology, Software Design
- Certifications: CAPM (ongoing), Google Project Management Diploma, Jira Agile Certification, Financial Modeling Foundation, SAP Activate

RELEVANT EXPERIENCE

Project Delivery Specialist Intern

Royal Bank of Canada

Sep 2026 - Present, Toronto, ON

- Managed an early data talent program for 35+ participants and built a VBA-enabled tracking system to monitor readiness, engagement, and development against defined FTE capability requirements.
- Worked with senior leaders and an external technology partner to define user requirements, prepare participant data, and support migration to an enterprise mentoring platform across interns and employees.
- Built an intelligent agent used regularly by a small project team to automate Jira documentation and project-support materials, improving consistency across recurring Kanban-based delivery workflows.

Emerging Technology Assistant & Department Programs Associate

University of Toronto Scarborough (Department of Management)

Apr 2025 - Present, Toronto, ON

- Partnered with faculty to pilot a VR-based learning application where 15 students practiced pitching with AI personas, creating a new assessment-preparation format with plans for broader curriculum adoption.
- Led 3D-printing initiatives by designing and producing 40+ custom models for students and faculty, then developed a standardized operating procedure to support consistent future use.
- Updated program digital assets through Figma and structured participant data in SharePoint and Excel, eliminating duplicate records and creating a more reliable source for program delivery.

Program Operations & Internal Strategy Coordinator

Management & Technology Association @ University of Toronto Scarborough

Sep 2024 - Present, Toronto, ON

- Co-led Data Analytics Case Competition, structuring a multi-stage project and coordinating stakeholders across students, faculty, and industry.
- Built and reconciled a \$5K+ financial tracking system by reviewing bank activity, identifying and resolving legacy discrepancies, and structuring documentation, improving reporting transparency and resulting in \$200 in additional departmental funding.

PROJECT

ECLIPSE 2026 Case Competition

- Researched AI architectures and competitor strategies to identify a privacy-focused approach that balanced user trust with product differentiation.
- Recommended an on-device AI model and implementation roadmap to reduce sensitive-data exposure while supporting personalization, customer retention, and long-term revenue growth.
- Built a financial model and executive pitch linking technology adoption to acquisition costs and customer lifetime value, earning 1st Place in a province-wide university case competition judged in part by a company director.

AWARDS & ACHIEVEMENTS

- Associate of the Year (2025) – Management & Technology Association (MTA)
- Finalist – Innovators Den (Shark Tank-style competition)
- Languages – English (Fluent), Ukrainian (Fluent), Russian (Fluent), French (Intermediate), Mandarin (Intermediate)
